

THE INSIDE SCOOP ON ELECTRONIC SIGNATURES

Evaluating the best eSign solution for your company

Electronic documents can be completed
80% FASTER
than paper documents

Security. Efficiency. Workflow Automation.

Businesses all over the world are adding electronic signatures to their document workflows ...

...but, not all eSignature solutions are equal.

TOP 4 CONSIDERATIONS WHEN CHOOSING YOUR ESIGN SOLUTION

1. YOUR USERS & USE CASES

Can the solution support all your users who need eSignatures for different use cases?

Does it work across devices, operating systems and browsers?

How easy is it to set up and roll out new use cases? Can it be done in a day or does it take weeks?

Does it support large volumes of signatures? Or do you have to limit users and use cases to fit your budget?

Can it be incorporated into all your different workflows – sales, finance, human resources, legal, etc.?

Does it integrate with your existing business applications?

2. LOCAL REGULATORY REQUIREMENTS

Can the solution support the requirements of all the regions and industries you do business in?

Icons representing regulatory requirements: eIDAS, Electronic Transactions Ordinance, Electronic Transactions Act of 2010 in Singapore, eIDAS, Electronic Transactions Act and Corporations Act, ZertES.

3. TYPE OF ESIGNATURES NEEDED

Does the electronic signature offer the level of assurance needed to comply with regulations relevant to your business?

Assurance questions: Is the signature uniquely linked to the signer? How confident are you that the signature is created under the sole control of the signer? Is the signature linked to the data signed in such a way that any subsequent change in the data is detectable? Can you identify the signer?

4. YOUR ID METHOD REQUIREMENTS

Authentication contributes to the enforceability of signed documents. Does the solution validate who you are transacting with?

ID method requirements: One-time passwords via SMS and email, Mobile identities, No authentication, Smartcard/tokens, Bank authentication, Biometrics, Login & password (including SSO).
